BEFORE YOU JUMP

PLEASE BE FAMILIAR WITH THIS INFORMATION BEFORE VISITING
EXTREME AIR PARK INDOOR TRAMPOLINE PARK

In order for you to maximize your fun at Extreme Air Park, here are a few things you need to know.

WAIVER:
Before jumping at Extreme Air Park Indoor Trampoline Park there is a bit of paperwork that is required. Everyone who is going to jump MUST have a signed liability waiver. If a jumper is under the age of 19, the liability waiver MUST be signed by the minor's parent/guardian. A waiver must be completed for each and every visit. We recommend you print off a waiver, fill it out and have it signed prior to coming in.

TRAMPOLINE SAFETY:
Trampoline activities are an extremely safe form of exercise and fun. However, many people have apprehensions regarding trampoline activity. Although the concerns are legitimate, these concerns stem from use and reputation of backyard, non-industrial manufactured type trampolines. The negative stigma is due to improper use or set up of these “personal” trampolines. Most major injuries arise from improperly covered springs, and especially jumping on a trampoline without an enclosure or net, to prevent falling off. WE ARE DIFFERENT! Our trampolines are constructed in North America, engineered in North America, and are made with high strength industrial padded frames, rather than standard tube frames most trampolines are framed with. All our springs are covered with 2in foam pads, which are connected and locked to the mat and frame system. All our mats are enclosed with 7ft - 45-degree trampoline walls. As a result, no jumper can ever fall off or jump out of the courts, land on a hard metal tubing, or get caught in springs. Our trampoline system is CSA (Canadian Sports Association) approved, and is 100% safe! The main exposure to risk at our facility will be from not following the Jump Rules, not our trampolines. With that said, provided you follow EAP’s Rules you should have no risk of injury.

INJURIES:
Our injury rate is 0.2%. This means 2 out of every 1,000 trampoline jumpers will get some type of injury. We count all injuries, even if we just hand out an ice pack. The vast majority of these injuries are minor. Very few are serious. In order to understand the level of our injury rate, there must be a comparison to other physical activities that kids do on a regular basis. Below is a chart comparing our facility to other sports.
